

Client/Server computing has become an important industry trend. MAS 200 accounting and business management software incorporates thin client/server technology to add new capabilities. When you choose MAS 200, you'll receive key benefits that only client/server architectures can provide, such as more efficient distributed processing, high performance, enhanced data integrity and reliability, remote access support and scalability for large numbers of users.

## Recommended System Configuration for MAS 200 Client/Server

### Client Workstation

SYSTEM	Processor	Memory	Add MB per user
Windows 95/98 <sup>1,2,3,6,7</sup>	Pentium 166MHz or higher	32 MB	
Windows NT Workstation 4.0 <sup>1,2,3,7</sup>	Pentium 166MHz or higher	64 MB	
Windows 2000 Professional <sup>1,2,3,7</sup>	Pentium II 300MHz or higher	64 MB	
<b>SERVER</b>			
Windows NT Server 4.0 <sup>2,3,4,5,7</sup>	Pentium 166MHz or higher	64 MB (5 users)	4-6 MB/user
All Versions			
Windows 2000 Server <sup>2,3,5,7</sup>	Pentium II 300MHz or higher	128MB	4-6 MB/user

<sup>1</sup>10MB or more of local hard drive space required for MAS 200 workstation components.

<sup>2</sup>LAN support requires networking hardware; TCP/IP protocol active.

<sup>3</sup>Remote dial-in support requires 28.8 Kbps modem(s); TCP/IP protocol active; Windows NT Remote Access Services (RAS) active on the server.

<sup>4</sup>Windows NT 4.0 (refer to OSPCM for Service Pack levels).

<sup>5</sup>1GB hard disk or larger.

<sup>6</sup>Windows 95/98 must be installed on the local workstation.

Requires VGA display adapter capable of 640 x 480 resolution at 256 colors. SVGA running 800 x 600 recommended.

<sup>7</sup>Only Intel® Pentium class or better processors are supportable with MAS 200.

**Note:** These configurations have been thoroughly tested on systems running MAS 200 alone. We cannot guarantee acceptable performance on or support for lesser configurations. You may require a more powerful configuration if you intend to run MAS 200 plus other RAM-intensive applications at the same time, since multitasking could adversely affect your MAS 200 performance. These requirements are subject to change. Prior to installing the MAS 200, please review the most current Operating System/Platform Compatibility Matrix, which can be found on the Sage Web site at <http://www.us.sage.com/mas90w/support/charts/ospcm/default.htm>. It is also important to view the Hot Pre-Installation Issues found at <http://www.us.sage.com/mas90w/support/pre-install.htm>.
