MAS 90® accounting software offers a broad range of modules designed to meet the needs of virtually any business. Choose to integrate as many modules as are beneficial to your business, and the resulting system can be truly more powerful than the sum of its individual components. Additionally, as your business continues to grow, you can have the confidence of knowing there are additional MAS 90 modules that can provide you with the best solution to all of your business needs.

Regardless of the platform you choose, MAS 90 can meet your requirements with Windows®, Windows NT® and UNIX versions of the product. Functional on both the traditional local area network (LAN) and single-user environments, as well as wide area network (WAN) environments, MAS 90 allows you to expand your systems to accommodate greater numbers of users and provides more rapid transaction processing in the UNIX and Windows NT environment.

Designed to deliver industry-leading “benchmarked” performance for fast, reliable data throughput, MAS 90 Client/Server is ideal for multi-site businesses and requires no additional remote access software. Optimized for TCP/IP, this dynamic solution is Internet — and intranet — compatible and provides the fast, reliable network connections you need with MAS 90 Client/Server’s thin client architecture.

See reverse side for list of features

FEATURES

CORE ACCOUNTING

Based on the elements that compose the heart of any accounting system – manual or computerized – the core accounting solution consists of the Accounts Payable, Accounts Receivable, Bank Reconciliation, Fixed Assets, General Ledger, Magnetic Media Reporting and Payroll modules to help provide a seamlessly integrated accounting foundation for your business.

DISTRIBUTION

Designed to enable seamless integration of accounting, customer service and inventory tracking data into one rock-solid system, the distribution solution consists of the BarCode Master, Inventory Management, Purchase Order Processing and Sales Order Processing modules.

MANUFACTURING

Consisting of the Bill of Materials, Materials Requirements Planning and Work Order Processing modules, the manufacturing solution allows you to create multi-level bills and track materials and labor costs throughout the shop floor to completion. Finished goods are posted to inventory or sales order for seamless integration with the distribution system.

CONSTRUCTION

Integrating the core accounting solution with the Job Cost and TimeCard modules, the bedrock of our construction solution is its ability to track and manage job estimates, costs and profitability.

PROFESSIONAL SERVICES

Specifically developed for project-oriented industries that provide services from a broad range of categories, including accounting, consulting and legal services, this solution consists of the Client Write-Up and Time & Billing modules. Full integration with other MAS 90 modules enables you to share common information and control costs.

BUSINESS INTELLIGENCE/INTEGRATION TOOLS

Transform your accounting system into a total business solution with the following “best-of-breed” tools: Crystal Reports®, Custom Office, F9®, FRx® Financial Reporting Extender and ImportMaster. Designed to increase productivity and enhance functionality, these customizable report writers and integration tools work seamlessly with MAS 90 to create an all-encompassing information management system for your business.
