for:

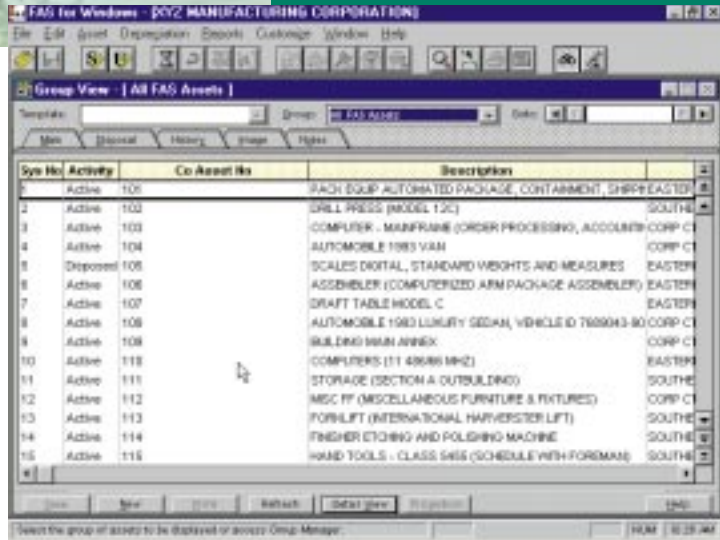

Windows®

Client/Server for Windows NT®

Client/Server for UNIX® Systems

## Fixed Asset Management

- User-Definable Group Manager
- Asset Detail and Group Views
- More Than 20 Customizable Reports
- Automatic AMT and ACE Calculations
- Windows 95/NT Compatible

Fixed assets can account for a significant percentage of your company's assets. As such, they can have a dramatic impact on your bottom line. Yet managing these assets can be a challenge, especially if your management software does not allow customization to fit your business or will not integrate with your Windows-based client/server environment.

For years, Best Software's Fixed Asset System (FAS™) programs have been an industry leader in fixed asset management capability and versatility. FAS for Windows now extends that capability and versatility to Windows 95/NT users. FAS for Windows combines the acclaimed depreciation expertise of FAS with the power and user-friendliness of Windows. It is designed to deliver new management freedom, customizable control and fast and reliable performance — from initial data entry to automatic calculations and detailed reporting.

With FAS for Windows, you can define groups of assets as you go and base them on any characteristic. You then can depreciate the group, report on it, change asset locations, and dispose of assets with just a few keystrokes. The system also can automatically create AMT and ACE schedules, with your choice of more than 20 depreciation methods including MACRS 150% and 200%, ACRS, Straight Line, Modified Straight Line, and Declining Balance.

In addition, FAS for Windows lets you view asset details from all seven books: tax, internal, state, AMT, ACE, and two user-defined custom books — all on a single screen.

FAS for Windows integrates seamlessly with MAS 90 through the FAS Link™ to create a comprehensive, sophisticated, dependable, and easy-to-use total accounting management system.

*See reverse side for list of features*

## FEATURES

Group Manager	Group Manager lets you define groups of assets as you go. Definitions can be based on any characteristic including type, location, custodian and acquisition date. Depreciation, reporting, location change, and disposal require only a few keystrokes to implement.
Asset Detail View	This feature allows you to view all details of an asset on a single screen. Details are displayed from all seven books: tax, internal, state, AMT, ACE, and two user-defined custom books.
Asset Group View	With FAS for Windows, you can work with and view multiple assets simultaneously. The powerful Group Manager function also gives you the flexibility of changing asset groupings in process so you can modify the Asset Group View selection easily without having to exit or cut and paste.
Asset Images	Pictures of an asset, purchase order, maintenance agreement, warranty, invoice and other documentation can be scanned into the file and viewed on screen at any time, providing a complete and readily accessible record of all asset data.
Asset Navigation and History	In addition to the system's powerful query capabilities, FAS for Windows provides instant switching between Main and Disposal functions, a complete audit trail of the major events in an asset's life, and a facility for attaching notes to record important details.
Extended Fields	Description fields can be up to 80 characters in length, and extended user fields can accommodate up to 25 characters, affording optimal space for easy and complete asset definition.
Automatic Calculations	FAS for Windows automatically creates AMT and ACE schedules, using your choice of more than 20 methods of depreciation including MACRS 150% and 200%, ACRS, Straight Line, Modified Straight Line, Declining Balance and Sum-of-the-Years Digits. Other automatic calculations available range from Full Month Convention, Mid Quarter Convention, and Half-Year Convention to Section 179, ITC, Gain/Loss, Salvage Value and Tax Preference Amounts. The system also provides the flexibility to create customized methods in each company.
Reporting and Audit Schedules	More than 20 standard reports are available, each allowing user-defined sort and range criteria on all fields. Reports present only the assets specified and in the order desired. For added convenience and efficiency, depreciation can be calculated without running a report.
Database Versatility	FAS for Windows accommodates a relational database structure for assets, and the system supports virtually all database management architectures and programs. Data entry screens are fully customizable, including field names, field lengths, field pictures, field prompts and field on/off status.
Windows Compatible	FAS for Windows is compatible with Windows 95, and Windows NT. The system also imports from a wide range of popular Windows applications including Microsoft® Excel®, Microsoft Word®, Microsoft PowerPoint® and Lotus® 1-2-3.
MAS 90 Compatible	All features and functions of FAS for Windows integrate completely with the MAS 90 core program and MAS 90 modules for seamless and comprehensive accounting management performance.
Online Help	Instant context-sensitive online Help is always available. Furthermore, customizable Help for online corporate guidelines can be added easily.
Technical Support and Updates	A FAS SupportPlus™ membership provides access to toll-free phone assistance, automatic free system enhancements and updates, automatic tax law updates, 24-hour access to the FAS Member's Lounge at the Best Software Web site and a wide array of other privileges and value-added benefits.
