Advanced Fixed Asset Management

- Partial and Whole Transfers and Disposals
- Merge and Extract Companies
- Fully Customizable and Automatic
- Password Security
- Windows 95/NT Compatible

In larger or decentralized organizations, fixed asset management can pose complex challenges in administration, access, user-specific customization and system security. Compatibility with existing accounting software and the client/server environment can be of equal concern.

Best Software's FAS™ Encore system has become the Windows-based fixed asset management software of choice for capability and versatility in small to medium-sized companies. Now FAS Encore extends that capability and versatility to larger or decentralized organizations. FAS Encore combines the acknowledged depreciation expertise and user friendliness of FAS Encore with the added power and functionality your situation demands. It was developed exclusively to meet the complex needs of large businesses, providing fast, dependable, customizable fixed asset management performance and data security.

FAS Encore provides the additional ability to execute partial and whole transfers and disposals, conduct bulk disposals with automatic gain/loss calculations and track transfer activity with as little as a single keystroke. You also can create custom reports quickly and easily, including custom consolidated reports that let you "roll up" data without changing the underlying database.

Plus, FAS Encore provides extra security features at the system level, company level and user-defined menu levels, as well as fully controlled access to pre-defined SmartLists. Finally, FAS Encore integrates completely with MAS 90, through the FAS Link, creating a powerful, reliable, easy-to-use, and secure total accounting management system for your entire organization.

Best! FAS Asset Accounting

99.2 FAS Report Writer

FEATURES

Transfers and Disposals	With FAS Encore, you can execute partial and whole asset transfers and disposals automatically, manually, or according to user-defined depreciation schedules. For bulk disposals, the system also automatically calculates gain/loss on individual assets.
Group Manager	Group Manager lets you define groups of assets as you go. Definitions can be based on any characteristic including type, location, custodian and acquisition date. Depreciation, reporting, location change and disposal require only a few keystrokes to implement.
Asset Views	Asset Detail View allows you to view all details of a single asset from all seven books on a single screen. In Asset Group View, you can work with and view multiple assets simultaneously.
Asset Images	Pictures of an asset, purchase order, maintenance agreement, warranty, invoice and other documentation can be scanned into the file and viewed on screen at any time, providing a complete and readily accessible record of all asset data.
Asset Navigation and History	In addition to the system's powerful query capabilities, FAS Encore provides instant switching between Main and Disposal functions, a complete audit trail of the major events in an asset's life, and the facility for attaching notes to record important details.
Extended Fields	Description fields can be up to 80 characters in length, and extended user fields can accommodate up to 25 characters, affording optimal space for easy and complete asset definition. Up to 100 characters can be entered for General Ledger account numbers.
Automatic Calculations	FAS Encore automatically creates AMT and ACE schedules using your choice of more than 20 methods of depreciation including MACRS 150% and 200%, ACRS, Straight Line, Modified Straight Line, Declining Balance and Sum-of-the-Years Digits. Other automatic calculations available range from Full Month Convention, Mid Quarter Convention and Half Year Convention to Section 179, ITC, Gain/Loss, Salvage Value and Tax Preference Amounts. The system also provides the flexibility to create customized methods in each company.
Custom Report Writer	More than 20 standard reports are available, each allowing user-defined sort and range criteria on all fields. You also can create custom reports with built-in report helpers, produce custom consolidated reports that let you "roll up" data without changing the underlying database and specify totals-only reporting for standard reports.
Extra Security	FAS Encore can assure complete security at user, user-defined menu, system and company levels, protecting important or proprietary data from unauthorized access or manipulation. This security feature also includes fully controlled access to predefined SmartLists for fewer data entry errors.
Windows Compatible	FAS Encore is compatible with Windows 95 and Windows NT. The system also imports from a wide range of popular Windows applications including Microsoft® Excel®, Word®, PowerPoint® and Lotus® 1-2-3.
MAS 90 Compatible	All features and functions of FAS Encore integrate completely with the MAS 90 core program and MAS 90 modules for seamless and comprehensive accounting management performance.
On-line Help	Instant context-sensitive on-line Help is always available. Furthermore, customizable Help for on-line corporate guidelines can be added easily.
Technical Support and Updates	A FAS SupportPlus membership provides access to toll-free phone assistance, automatic free system enhancements and updates, automatic tax law updates, 24-hour access to the FAS Member's Lounge at the Best Software Web site and a wide array of other privileges and value-added benefits.
